

# ALFA ROMEO

## FORMULA 3 | Billet Flywheel

Alfa Romeo F3 Flywheel, designed, developed and manufactured in-house by Ark Racing Limited., it is made to the highest standards using high-grade steel, Nitrided heat treatment with a Shot Peened surface treatment.

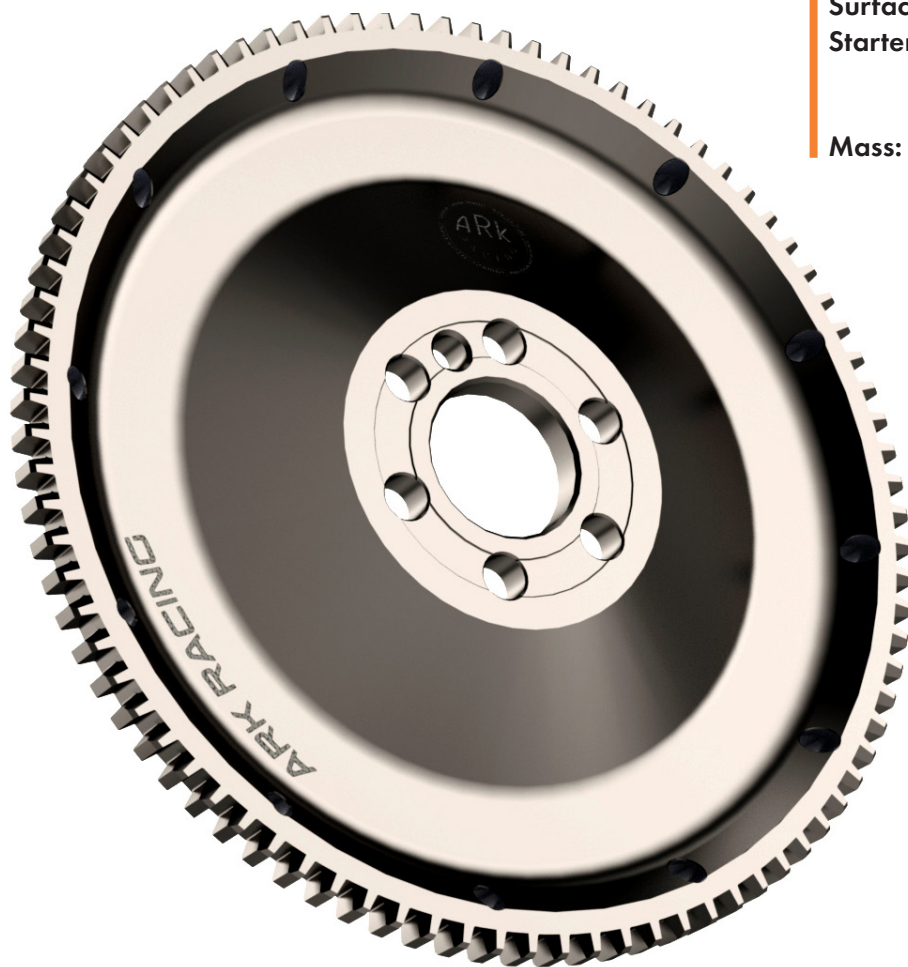

Developed and manufactured to professional motorsport standards keeping strength, durability and weight (mass) in mind. Early Alfa F3 Flywheel.

Available to order.

Suitable for: **ALFA F3 Race Car.**

### SPECIFICATION:

<b>Material:</b>	817M40T (Steel)
<b>Heat Treatment:</b>	Nitride
<b>Surface Treatment:</b>	Shot Peened
<b>Starter Ring:</b>	Cut into the flywheel (Not a separate Ring Gear)
<b>Mass:</b>	Lightweight version 3.07 Kg (6.76 lb)

*"Ark Racing components are high-quality, bespoke designed and manufactured to order!"*

NOTE: \*It is a myth that a lightweight flywheel gives you more power. It actually doesn't! What it does achieve is it reduces the rotating mass and inertia in your vehicle. The result is your engine isn't using valuable horsepower spinning up a heavy flywheel, it's going straight to your wheels onto the road which is where you need it, with the bonus of making your car lighter.

Ark Racing design and manufacture numerous Starter Motors and Flywheels for Alfa Romeo engines for Motorsport & Historic Sports Cars.
