

MODULAR Starter Motor | Kit

Arks, 1.4 kW Modular Starter Kit is one of our oldest and most popular units, designed, developed and manufactured in-house at Ark Racing Limited. It is made to the highest standards using high-grade steel and aluminium. Developed and made to professional motorsport standards, providing excellent starting performance, endurance and reliability for today's driver. With a power rating of 1.4 kW (Japanese International Standard),

It is designed to fit with minor modifications to almost all Lucas starter derivatives. It is fitted to many F2, and Atlantic cars as well as many sports cars with BDA / BDG type engines. They will also fit Mk1 and Mk2 Escorts and Cortina's. If you think this starter is what you need then call and we will get the details of your car and build a starter to suit it.

Suitable for: Mk1 & Mk2 Ford Escorts and Cortina's.

All Lucas starter derivatives. F2, Atlantic cars, sports cars with BDA / BDG type engines.
