

OFF-CAR Starter Assemblies

Ark Racing are specialists in Off-Car starting solutions, used to great effect in professional motorsporting events like: FORMULA 1/2/3 , GP2/3, INDYCAR and classic/historic motorsport. Below are just some available for public viewing.

A11B

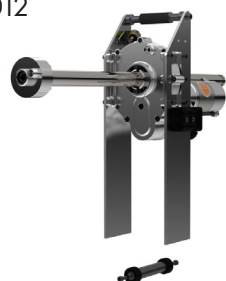

ARROWS F1

Universal Off-Car Kit

INDYCAR

012

TYRELL F1

Off-car starter motors are not installed directly in the vehicle. Instead, they are used externally for specific purposes.

Off-car starters provide increased starting torque, which is crucial for quickly cranking high-performance engines.

Off-car starter motors are typically designed to operate at voltages up to 24 Volts.

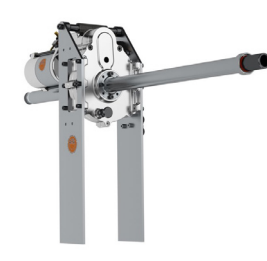

Off-car starters can have different power ratings (e.g., 2.0 kW or 4.0 kW) based on their intended use.

MCLAREN MP4-6

JORDAN

PENSKE PC20 INDYCAR

LAROUSE LOLA F1

ERA
